

Sapiens Foundation Report

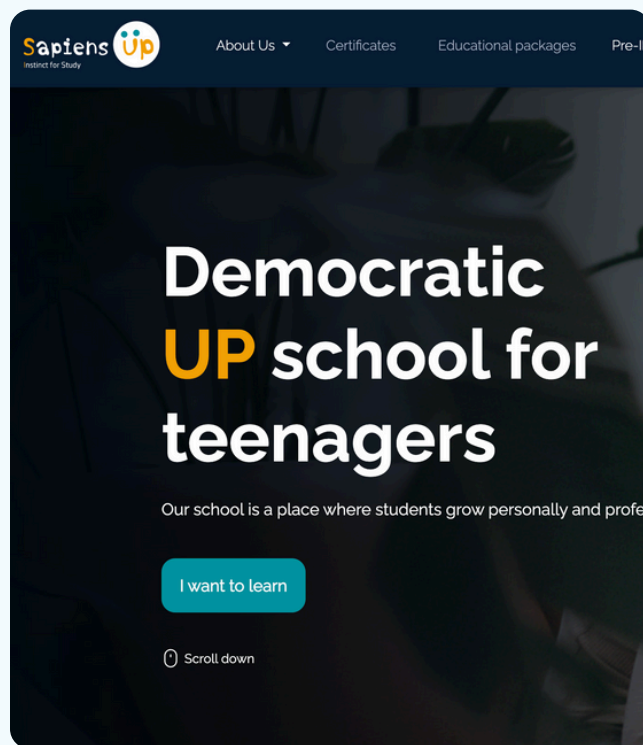

Our Mission

We EMPOWER FUTURE RESPONSIBLE LEADERS

- We are dedicated to shaping the next generation of **young responsible, self-realized leaders** — bold thinkers and creators unafraid to chart new paths.
- Through immersive, project-based learning, innovative educational environments, and socially impactful initiatives, we forge deep connections with communities to inspire meaningful change.

Focus Areas

These are the primary avenues through which we achieve our mission. Each focus area reflects a strategic effort to inspire change and promote responsible leadership.

**Creative Innovative
Educational
Environments**

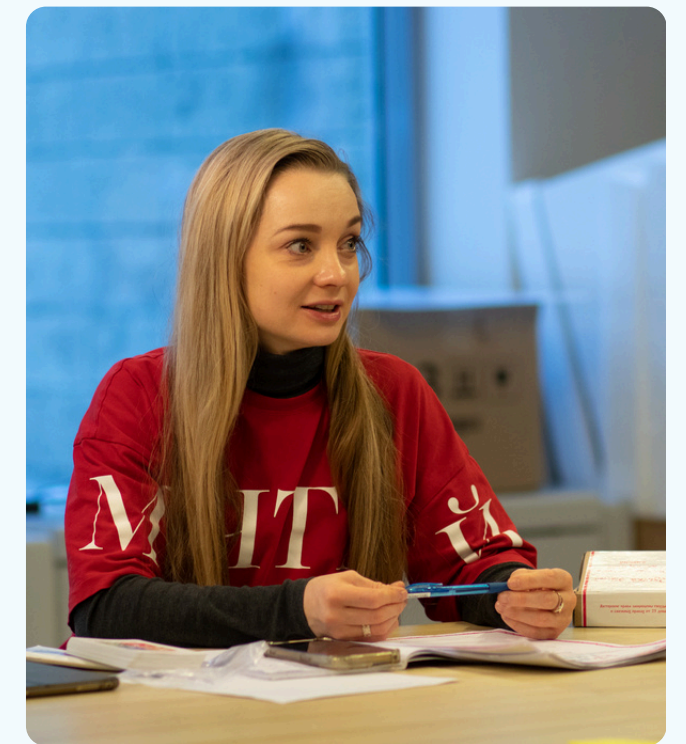

**Project-Based
Learning in High
Schools**

**Building
Connections with
Communities**

**Youth Startups
Accelerator and
Mentorship**

**Growing Innovative
Teachers'
Mastership**

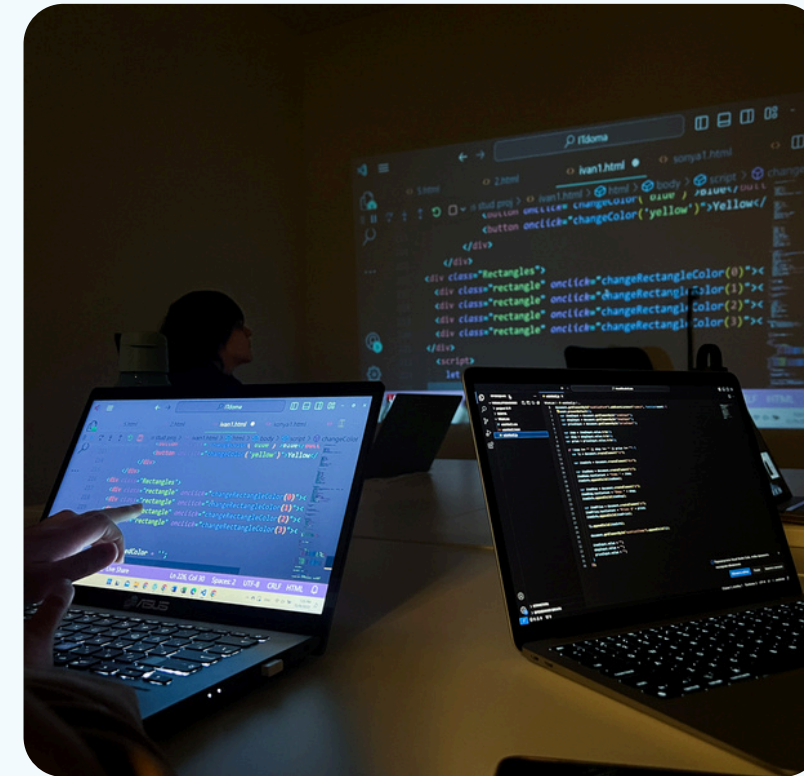

Our Financing

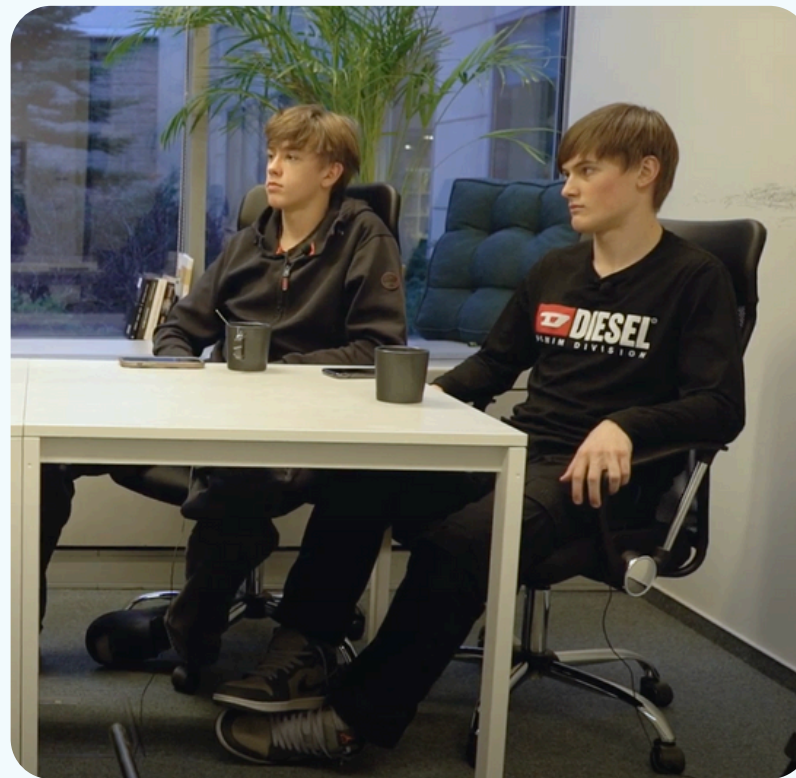

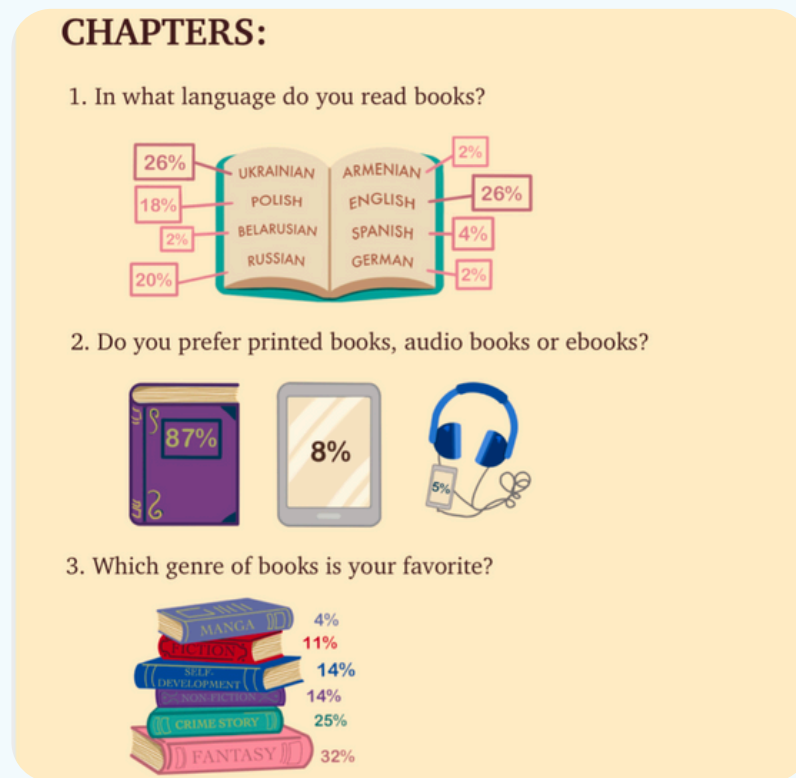

We have allocated funds across key initiatives to ensure the effective implementation of our mission. Each area represents a significant step toward achieving our goal.

BUDGET (PLN)	INITIATIVE
4,549 PLN	Growing Innovative Teachers' Mastership
1,469 PLN	Building Connections with Communities
36,608 PLN	Creative Educational Environments
15,000 PLN	Project-Based Learning in High Schools
57,626 PLN	TOTAL ASSISTANCE WITHIN THE FIRST YEAR

01 CREATIVE INNOVATIVE EDU ENVIRONMENT

- We have equipped an **IT classroom** at **Sapiens UP International Innovative School** with the necessary tools and technology to support IT specialization classes, providing students with the resources to excel in their technical education.
- We have organized a **Quiet Room**, created through a student-led project focused on **mental health support**. This space offers students a peaceful environment to rest between classes, escape noise, concentrate, and find grounding in a calm setting.

02 PROJECT-BASED LEARNING IN HIGH SCHOOLS

Our students have successfully completed **over 30 projects** during the school year, including:

- **Designing alternative posters for the U!FF Movie Festival**, inspired by films from Ukrainian directors.
- **Conducting a comprehensive social survey**, entirely organized by the students, which highlighted the diversity of tastes, religions, hobbies, genders, and languages in our community, **presented through infographics**.
- **Organizing a personal photo exhibition and event**, attended by **50 guests**, aimed at portraying the inner world of teenagers, including their feelings and thoughts.
- **Creating their own podcast** focusing on the opportunities and threats posed by **Artificial Intelligence (AI)**.
- **Leading recycling and renovation projects**, promoting **sustainability** and environmental responsibility.

03 BUILDING CONNECTIONS WITH COMMUNITIES

- We have organized the **Dream Job** project, collaborating with **over 10 companies** to help students explore career paths.
- We have built a **community of young poets and musicians**, where they write and present their work at **Literature Evenings**. These events, held 3-4 times a year, provide a platform for creative expression and meaningful connections.
- We have created the **Progressive Students' Library** by inviting **over 30 business participants** to contribute, expanding resources for students.
- As part of our projects this year, we supported the inclusive community by creating and spreading awareness through a **documentary film about inclusion in Warsaw**.

04 YOUTH STARTUPS ACCELERATOR & MENTORSHIP

- We have organized a **Business Specialization** opportunity where students gain valuable knowledge in entrepreneurship, develop their own business plans, and receive guidance throughout the process. At the end of the year, students have the chance to present their ideas to investors, **providing them with real-world experience and potential investment opportunities.**

05 GROWING INNOVATIVE TEACHERS' MASTERSHIP

- We have provided training for our teachers in areas such as **psychology, education, and child development**.
- We have also organized workshops on the values, mission, and principles of **Innovative Learning Environments (ILE)**, along with training on other relevant topics.
